

Securing the best grade  
possible in maths and  
English

**Welcome**

- We have faith in you.
- You could gain a 5 or above in maths and/or English.
- You're not there yet.
- We want to help.

"At Redborne you are never seen as a failure, but a work in progress."

*Amy Farrar  
Year 11 student*

What do  
you want?

**Focus tonight:**  
**Maths**  
**and**  
**English**

**Year 1-11:  
about 2,500  
lessons**

# Intervention and extra help

- Take control of your learning.
- Do what you need, not just what you are told.
- Work in partnership with teachers and parents.

- Make full use of your lessons.
- Make sure your attendance is good.
- Make every lesson count.

# What's in your folder?

# Will acting on the advice and tips from tonight make a difference?

- In 2016, **all but 5** students from this evening achieved a C or above, in **English** language
- In 2016, **all but 6** students from this evening achieved a C or above, in **maths**

*My dad kept making me practise my times tables. It got on my nerves, but it did mean I was quicker in my non-calculator paper*

# How to achieve your potential in English...

## A toolkit for success

# Fast forward... to August 2018

Think about...

- What you **want** to get from this subject?
- What you **NEED** in that envelope?
- What grade would make you *happy*?

# The English mark schemes:

**Clear**

*Relevant*

Accurate

*Range*

Chosen

Explained

Thoughtful

# What does *clear* and *relevant* mean?

- Easy to understand
- Free of obstructions
- Appropriate

# So what can parents and students do together?

- Parents: read your child's work.
- Parents: get your child to read their work out loud and notice errors in expression themselves.
- Both: broaden vocabulary
- Both: download word of the day apps
- Both: talk about what is going on in the world - conversations and practising how to articulate complex ideas will encourage cognitive development.
- Both: put phones away (in another room) at points in the evening.

# The English Language mark schemes:

Grade 4	Grade 5
<b>Attempts</b> to comment on the effect of <i>language and structure</i>	<b>Clearly</b> explains the effects of the writer's choices of <i>language and structure</i>
Selects <b>some</b> relevant quotations	Selects <b>a range</b> of relevant quotations
Uses <b>some</b> subject terminology, not always appropriately	Uses subject terminology <b>accurately</b>
Conscious use of vocabulary with <b>some</b> use of linguistic devices	Vocabulary <b>clearly chosen</b> for effect and successful use of linguistic devices
<b>Attempts</b> to <b>compare ideas</b> and perspectives	<b>Compares ideas</b> and perspectives in a <b>clear and relevant</b> way

# The English Literature mark schemes:

Grade 4	Grade 5
<b>Relevant</b> comment supported by <b>some explanation</b>	<b>Explained, relevant</b> comment with <b>clear</b> understanding
<b>Some</b> awareness of contextual factors	<b>Clear</b> understanding of contextual factors
<b>Some reference</b> to subject terminology	<b>Appropriate use</b> of subject terminology
<b>Explained/relevant</b> comments on writer's methods	<b>Clear explanation</b> of writer's methods
<b>References used to support</b> a range of relevant comments	<b>Effective use of references</b> to support explanation
<b>Some comparison</b> of effects of writers' methods on reader	<b>Relevant, thoughtful comparison</b> of effects of writers' methods on reader

# How to revise for English Language

- Learn **language terminology**.
- Be clear on how to use **punctuation** correctly, especially **apostrophes** (use BBC bitesize to test yourself).
- Read a range of **articles that interest you: challenge yourself. The Times, The Guardian... Use the internet!**
- Listen to the news and speeches on Youtube.

# How to revise for English Literature

- **Re-read set texts** (use an audio version). Have thorough annotations.
- Learn **key quotations**: display around the house, learn like a script, repeat out loud, emphasise patterns in the language when you say them out loud, use rhyme to your advantage, watch film adaptations of the texts with the text in front of you.
- **Read over poems**, one per night. Just 5 – 10 minutes can make a difference – keep your **anthology** in a **visible place or next to your bed**

1st person

Robert Browning  
(1812-1889)

Form - Dramatic monologue

Rhyme - AABB Scheme - rhyming couplets  
Structure - one long stanza - no white spaces  
- reflective of the speaker's manner, talking continuously - arrogant, contrived conversation.

# My Last Duchess

Ferrara  
1 That's my last Duchess painted on the wall,  
Looking as if she were alive. (call)  
That piece a wonder, now: Frà Pandolf's hands  
Worked busily a day, and there she stands.  
"Will't please you sit and look at her?" (said)  
'Frà Pandolf' by design, for never read  
Strangers like you that pictured countenance,  
The depth and passion of its earnest glance,  
But to myself they turned (since none puts by  
The curtain I have drawn for you, but I)  
And seemed as they would ask me, if they durst,  
How such a glance came there; so not the first  
Are you to turn and ask thus, 'Sir, 'twas not  
Her husband's presence only, called that spot  
Of joy into the Duchess' cheek; perhaps  
Frà Pandolf's glance to say, 'Her mantle laps  
Over my lady's wrist too much,' or 'Paint  
Must never hope to reproduce the faint  
Half-flush that dies along her throat'; such stuff  
Was courtesy, she thought, and cause enough  
For calling up that spot of joy. She had  
A heart - how shall I say? - too soon made glad,  
Too easily impressed; she liked white er  
She looked on, and her looks went everywhere.  
25 Sir, 'twas all one! My favour at her breast,  
The dropping of the daylight in the West,  
The bough of cherries some officious fool  
Broke in the orchard for her; the white mule  
Seen it must have had eyes for her.  
- A bright wit of reason - possesses everything she did

Purity/innocence Enchantment

is an english poet I lecture and  
translator published over fifteen  
non- autobiographical collection (1993)

Carol Rumens  
(b. 1944)

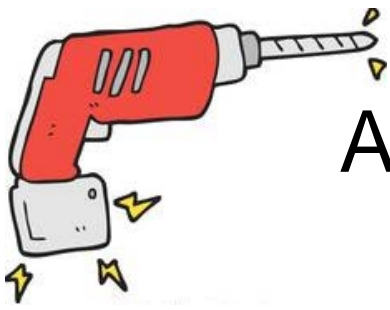

is an english poet

# The Emigree

where once was a country, I left it as a child  
but my memory of it is sunlight-clear  
for it seems I never saw it in that November  
which, I am told, comes to the mildest city.  
5 The worst news I receive of it cannot break  
my original view, the bright, filled paperweight.  
It may be at war, it may be sick with tyrants,  
but I am branded by an impression of sunlight.  
The white streets of that city, the graceful slopes  
glow even clearer as time rolls its tanks  
and the frontiers rise between us, close like waves.  
That child's vocabulary I carried here  
like a hollow doll, opens and spills a grammar.  
Soon I shall have every coloured molecule of it.  
15 It may by now be a lie, banned by the state  
but I can't get it off my tongue, it tastes of sunlight.  
I have no passport, there's no way back at all  
but my city comes to me in its own white plane.  
It lies down in front of me, docile as paper;  
20 I comb its hair and love its shining eyes.  
My city takes me dancing through the city  
of walls. They accuse me of absence, they circle me.  
They accuse me of being dark in their free city.  
My city hides behind me. They mutter death.  
30 and my shadow falls as evidence of sunlight.

Juste  
longer  
who is they

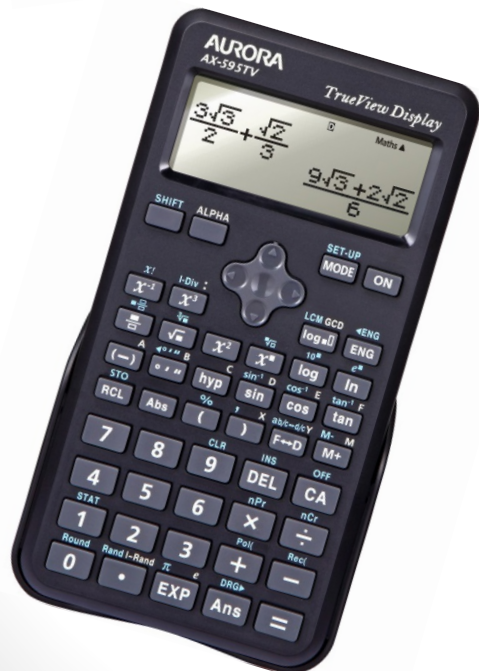

A common misconception students have: 'I can't revise for English!'

- Practise, practise, practise!
- Ask your parents to **time you** to get a feel for the pressures of exam settings
- The key is to **master** your skills so that you feel **confident**

**Achieving  
your best  
grade in  
maths**

TOP TIPS:  
Get the right  
equipment.

&  
Revision

Spelling

Bedtime  
(+ 20 mins  
Angry Bird)

### TOP TIPS:

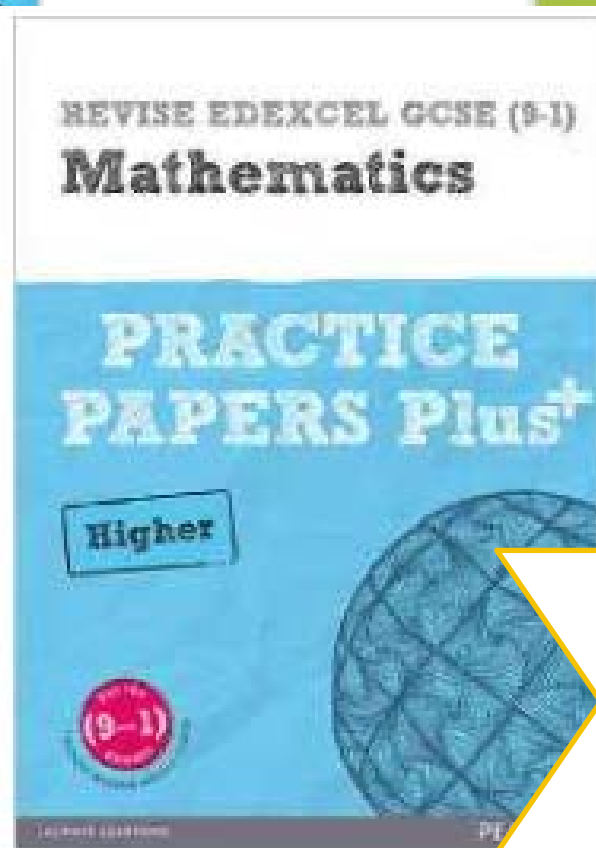

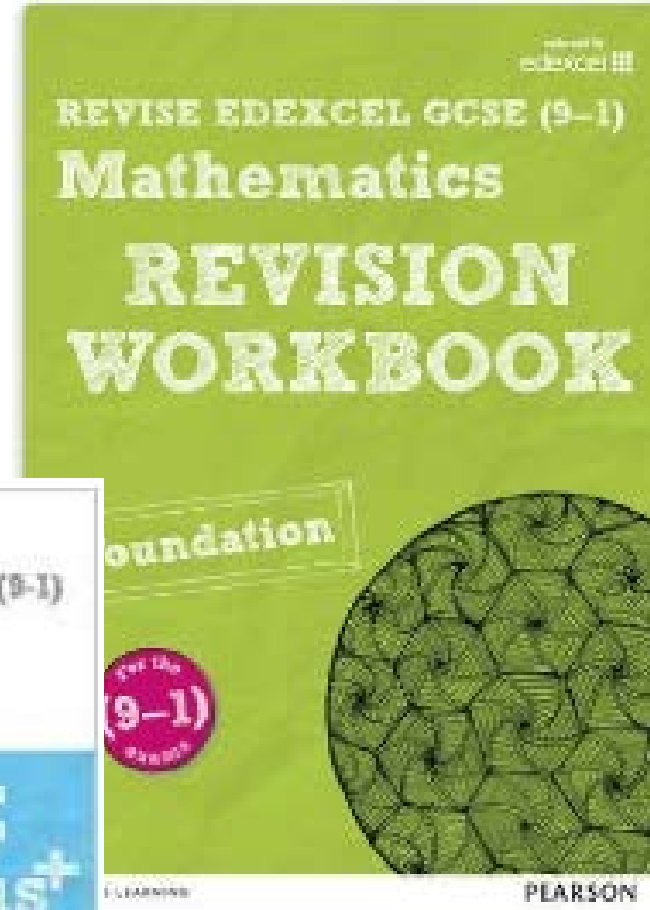

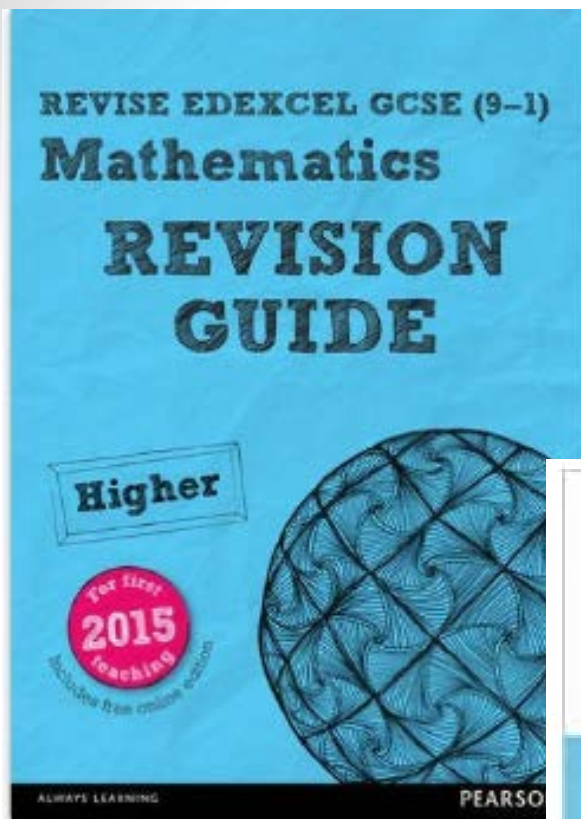

Plan time in  
your day for  
revision.

Statistics and Probability		
B	Analysing data to compare with theoretical results	105
B	Finding median and inter-quartile range from cumulative frequency table or graph	10
B	Drawing box plots from a cumulative frequency table	
A	Constructing and interpreting histograms	
A	Understand stratified sampling	
B	Using tree diagrams for probability	
A	Find probability for combined events using multiplication and addition	

## TOP TIPS:

Use a topic list to plan what to revise.

Geometry		
B	Finding interior and exterior angles of polygons	64
A	Using circle theorems	67
A*	Knowing proofs of circle theorems	66
B	Describing transformations	68/69
A	Carrying out an enlargement with a negative fractional scale factor	69
B	Solving (multi-stage) trigonometrical problems	92
A	Finding trigonometrical solutions, e.g. $\cos x = 0.5$	92
A	Recognising graphs of trigonometrical functions	56
A*	Solving 3D trigonometry problems	96
A*	Transforming graphs of trigonometrical functions	57
A*	Transforming graphical functions, e.g. $y = f(x+a)$ ; $y = f(ax)$	58

### TOP TIPS:

Make sure you  
have a guide.

# BE POSITIVE AND CONFIDENT

It is the things we  
**WORK**  
hardest for that will  
**REWARD**  
us the most

TOP TIPS:  
Stay Positive.

*"My secret is practice - I have always believed that if you want to achieve anything special in life then you have to work, work, and then work some more."*

**David Beckham**

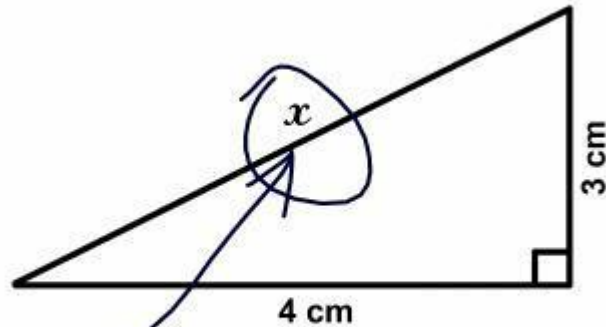

*"If people knew how hard I worked to gain my mastery, people would not think my work so wonderful at all."*

**Michaelangelo**

## TOP TIPS:

Don't just read  
Do maths little  
and often.

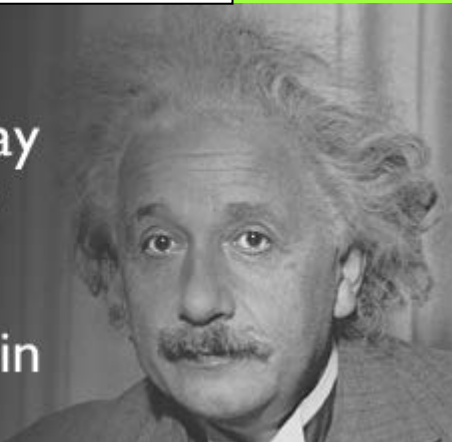

3. Find  $x$ .

*Here it is*

"It's not that I'm so  
smart, it's just that I stay  
with problems longer."

—Albert Einstein

KEEP  
CALM  
AND  
DO  
MATHS

1. Isolate your weaknesses

2. Work on your weaknesses

3. Practise! Practise! Practise!

Don't practise 'til  
you get it right.  
Practise 'til you  
can't get it wrong.

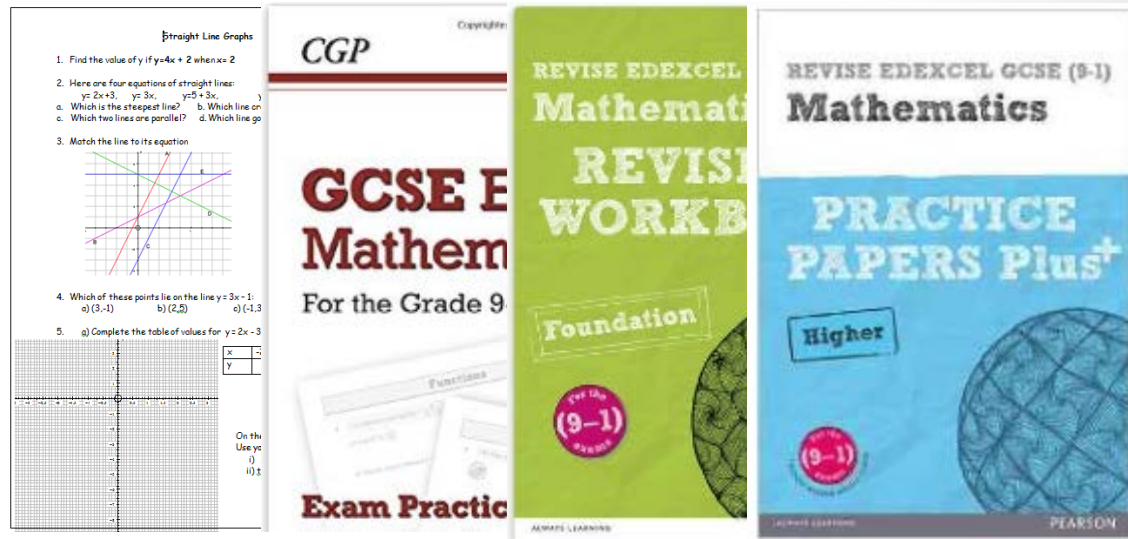

Work in  
timed  
conditions

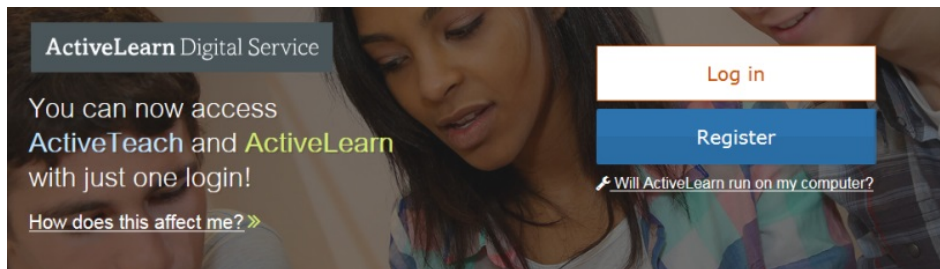

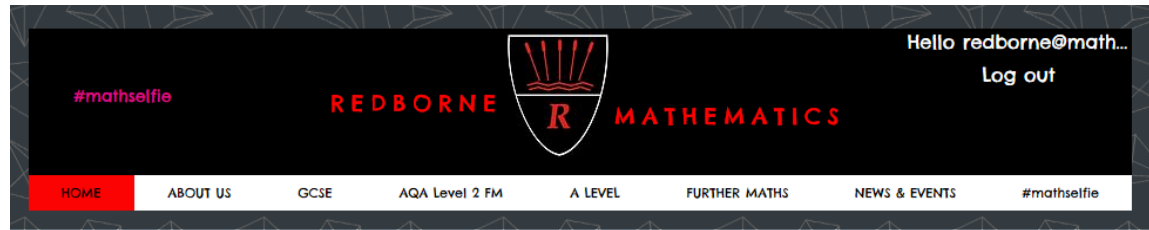

TOP TIPS:

Don't Revise.  
Practise!

## Newsfeed

See all

We have now added GeoGebra-powered graphing activities to the Edexcel GCSE (9-1) Mathematics course as well as questions to help students get started. [Click this link](#) to set your students a Getting started assignment that includes our guide to completing the graphing activities.

We are developing the first steps in uploading and displaying some of the data from the GCSE 2015 Markbook on ActiveLearn and would like to test what we have done so far with some "live" teachers. Testing will take about 20 mins and can be carried out remotely via a WebEx, or we could come to your school, especially if you would like to feedback about ActiveLearn in more detail. If you are interested in taking part, then please contact [\[email address\]](#)

If we click on foundation (under exercises or resources) we will be taken to all topic headings for the course content. Here you can practise all the core skills required for the GCSE.

Overview

Exercises

Resources

ActiveBooks

This section shows you the exercises available in your ActiveLearn course.

Foundation

Higher

▶ Getting started

▶ Unit 1 Number

▶ Unit 2 Algebra

▶ Unit 3 Graphs, tables and charts

▶ Unit 4 Fractions and percentages

1 paused

▶ Unit 5 Equations, inequalities and sequences

▶ Unit 6 Angles

▶ Unit 7 Averages and range

When you select a unit (here unit 4: fractions and percentages) you are presented with each subsection of that topic. There will be a variety of exercise on each subsection.

Unit 4 Fractions and percentages							1 paused
	Step						
	3rd	4th	5th	6th	7th	8th	
▶ 4.1 Working with fractions							
▶ 4.2 Operations with fractions							
▶ 4.3 Multiplying fractions							
▶ 4.4 Dividing fractions							
▶ 4.5 Fractions and decimals							
▶ 4.6 Fractions and percentages							
▶ 4.7 Calculating percentages 1							
▶ 4.8 Calculating percentages 2							
▶ Unit 4 Check up							
▶ Unit 4 Strengthen							
▶ Unit 4 Unit test							

RAGG summary: 2 exercises, all incomplete

If you hover over a box it will tell you what you have done and provide a summary

Within each subsection there are a number of exercises – these are levelled under the Pearson “12 steps” – with 1 being the easiest and 12 the hardest – these are not grades!

Progress

Textbook

## 15 Exam-style question

- a Expand  $6x(2x - 5y)$  (1 mark)  
 b Factorise completely  $4xy - 6xy^2$  (1 mark)  
 c Simplify  $\sqrt{9m^4n^6}$  (2 marks)

## Exam hint

Make sure that your final answer cannot be factorised further.

- 16 **Reflect** In this lesson you have learned about expanding, simplifying and factorising. Why do you think these methods have these names?

## 2.3 Equations

## Objectives

- Solve equations involving brackets and numerical fractions.
- Use equations to solve problems.

## Fluency

I think of a number, double it and add 1. The answer is 9. What number did I think of?

## Why learn this?

You can use an equation to work out the distances travelled of a car journey.

## Help me solve this

Solve the equations.

a)  $12r = 3r + 45$

Collect all the terms involving  $r$  on one side of the equation.

= 45

[Click here to show your workings](#)

Show

Reset activity

Progress

1/4

Check answers

Attempts

Close

The “Help me solve this” button will take students to a scaffolded version of the task

Students get 3 attempts – as they make each attempt, the tips get more specific:

Start by subtracting  $4i$  from both sides. Try again.

If they get it wrong every attempt they are shown the correct answer:

a)  $9i = 4i + 20$

$i =$

4

The tasks are all quite short but offer variety to expose misconceptions:

b)  $9i - 18 = 6i$

$i =$

This task is only 2 questions but you can see how students will need to appreciate how to rearrange to solve and not just learn by rote.

## 2.3 Q1 Solving simple equations with unknown on both sides A

### Results

How was the exercise?

Activity		Score	Attempts	Time	
1	<a href="#">Part a</a>	0/1	3/3	16:05	
2	<a href="#">Part b</a>	1/1	1/3	02:12

# MathsWatch

our VLE just a click away...

**NEW!!!**  
Dedicated GCSE version  
for WJEC.

Our subscription service allows teachers, students and parents to access the MathsWatch resource 24/7. One of the advantages of the online service is that it can be accessed from school, home, or in fact anywhere in the world. Another feature is its low price (works out as less than 50p per student for an average-sized school).

For those students that like to watch videos to help them learn, this resource is perfect. It is like having access to a maths teacher 24/7 – but one you can pause, rewind and turn off!

This is another resource where students can gain support and practice materials – all online and accessible on all formats.

Internet

Revision Resources

Teachers!

TOP TIPS:

Use all of your  
resources.

Don't just read through your notes - **make your brain work** ! e.g. old question papers; write summary notes; create a memory map.

**Test yourself; get others to test you**  
– how do you know you have learned what you set out to learn?

Revise when you are **alert/fresh**: well-rested; good diet; right frame of mind.

## Revision: five top tips

Make a **revision timetable** and make it **realistic** – plan 30 or 50 minute slots, with breaks in between.

Revise **little and often**: **repetition** helps learning so go through material 4/5 times.

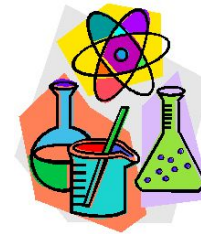

'Tell them that everyone says they should start revising, but it is definitely true. Well, maybe not full on revision, but do start making revision resources for all subjects and try to learn them. This takes ages.'

Current year 12 student

# How to revise for science.....

Little and often, but **often** is key  
Revision guides are useful....

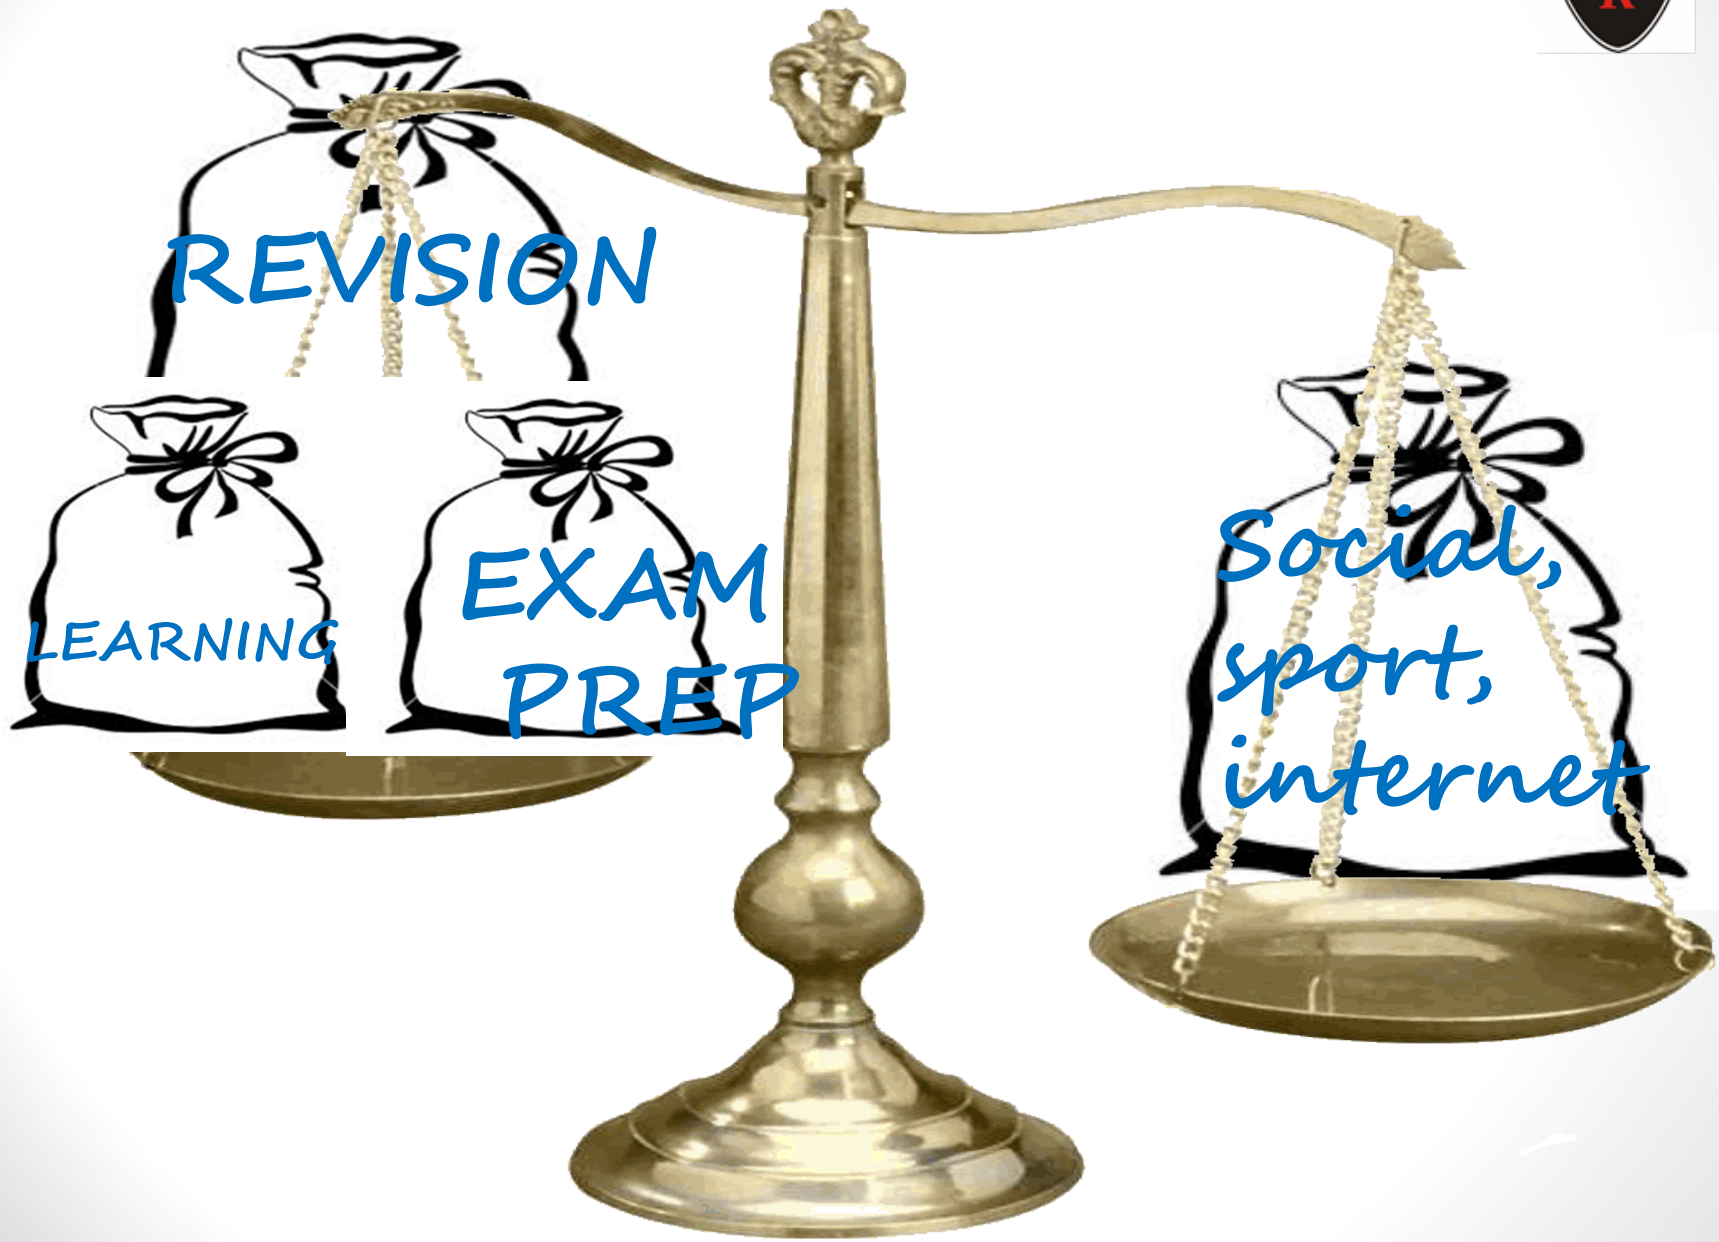

Take a page and learn it. **Mind map** it; **summarise** it;  
put **post its** around the room and learn them.

Draw **pictures** and **flow charts**.

**Teach it** to a friend, parent or carer but **don't just read...**

Parents and carers-please **test your child on what they have learned.**

**You don't have to understand a word of it!**

REVISION

LEARNING

EXAM  
PREP

Social,  
sport,  
internet

# Who does well in exams?

Those who find learning easy..

Also, those who can work hard and effectively over a sustained period of time

Easy to start now-harder to keep it going 'til May.....

23rd August  
2018

# You've been given a lot of information...

## How are you feeling?

Overwhelmed?

Bored?

Terrified?

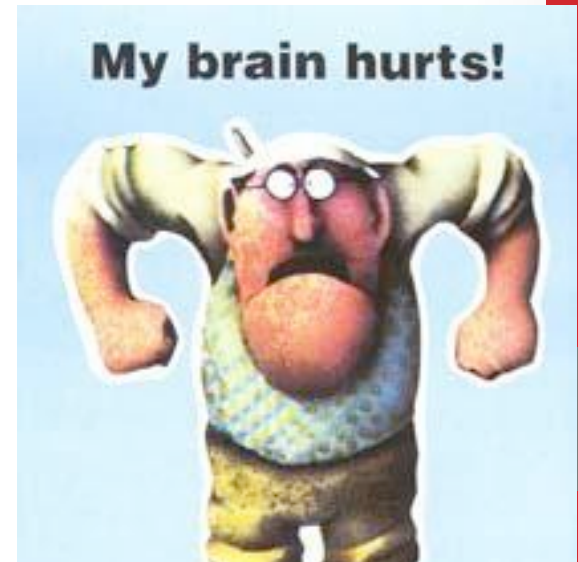

Excited?

Determined?

## How are your parents feeling?

Reassured?

Hopeful?

# The Home Stretch

- Students: What can you do?
  - Attend school. The link between attendance and exam pass rates is undeniable.
  - Try! How much time in lessons do you waste? Are you capable of working independently?
  - Take advantage of opportunities. Revision clubs / catch up sessions.
  - Start revising. Little and often.
  - Get organised. Stress is caused by a lack of preparation.
  - Reward yourself! Make time for some fun!

# The Home Stretch

- Parents Carers: What can you do?
  - Support us with attendance and punctuality.
  - Help organise your child's revision. ([getrevising.co.uk](http://getrevising.co.uk))
  - Build in some rewards if they stick to their revision schedules; create some incentives
  - Contact us if you have questions or concerns

# The Home Stretch

- I am very optimistic about next summer.
- There is nothing I want more than to see you all succeed.
- So make me proud, make your parents proud and do yourselves proud by taking control now.
- I promise, if you put in the effort now, you will reap the rewards in the summer.

**“Four short words sum up what has lifted most successful individuals above the crowd: a little bit more. They did all that was expected of them and a little bit more.”** (A. Lou Vickery, author)
